Deboe stated to a press representative
that he folt confident no emergency
would arise requiring assistance of
cleral authorities but intimated he
had if it beemen necessary.

There was no cliange in the simuton here Monday on either side. The
expected move of the Goebel leaders to

has been abandoned. The story from
Louisville that Jefferson and Elliot
county returns had been mysteriously
lost or tampered with is not credited,
as should this overar duplicate certificates could be easily obtained, and
the theff of them would not effect the
result.

The hotels of the cuty are filling up

the theft of them would not effect the result.

The hotels of the city are filling up with visiting republicans and demo-erats from many parts of the state. The report that Warden Lillard, under the direction of Goebel leaders, is arm-ing convicts and preparing to take the Goebel side in the event Bradley calls out troops Sturday, is absolutely un-founded. It is probable the sixting of the state election board will extend over several days, and it is stated that the democratic commissioners will re-fuse to begin canvassing the returns in the event tradley places a military guard over them.

## CHRISTMAS NOVEL TIES!

## WEDNESDAY, **DECEMBER 6, 1899,**

Is our Reception Day. From a bower of roses and palms a famous orchestra will discourse sweet music all day long.

Souvenirs of Flowers for all Lady Visitors!

Everyone is cordially invited to attend this reception. 8 a. m. until 10 p. m. Wednesday, December 6th, 1899.

An intimate acquaintance with the good people of Mason and surrounding counties has taught me that "There is nothing too good for them," and I have brought to Maysville the most elegant stock of Holiday Furniture ever exhibited in any town of less than 100,000 inhabitants. In fact Eastern craveling men openly state that these goods would do credit to any city. Having spent seven months collecting this stock of novelties, during which time I have searched all of America and part of Europe, I feel that I am entitled to some consideration at your hands. Not being of a very bashful nature I have no hesitancy in asking on the result of the property of t ing you for what I feel is due me, namely, that you take one day off and inspect this superb stock of Holiday Fur-niture and Novelties. I devoted seven months to gathering these novelties to Maysville; surely you can devote one day to an inspection of them. You will find that the time will pass pleasantly; delightful music will rest and soothe you when the eyes are tired feasting upon the beautiful Williams and Young to Contest.

Lexington, Ky., Nov. es.—Col. Roger
D. Williams, after republican candidates
for the legislature from this eity, will
contest the seat awarded Will Klair,
the demoerat. Milton Young, the republican candidate for state senator
from this contry and elty, will contest
the seat awarded J. Embry Allen, the
demoerat. Williams asys many men
who would have oreded for him were
howoid have one elected had not
the same all less achool house precincts in the county been prevented
from holding elections. Notice of contest was field Monday afternoon.

Retrospective: A little less than two years ago we
appeared in your midst with a new plan---a new method

appeared in your midst with a new plan---a new method of doing business. A cynical public and indignant com-petitors stood amazed when we announced our intention of selling Furniture and Farm Implements for cash at one price to all and that price just 10 per cent, above what the article cost in carload lots. We hoisted our 10-per-cent.for-cash flag and the fight was on. Competition was indignant over the fact that a stranger would dare to interfere with their old-time war profits. A cynical public doubted our integrity; friendly manufacturers doubted our ability to exist upon a profit of 10 per cent., and the battle

One Hundred and Twenty-Six Bags of Coal, Each Weighing 410 Pounds, Transferred in 66 Minutes.

Eighty-Eight of Them Were Delivered the limitle Ship in Forty-Four Min ules—A Description of the Modus Operandi.

New Yonk, Nov. 28—As a result of three days' trial of "coaling ship" while towing at sea, just completed by the Util of the state of the ship point of the ship will be the ship to receive coal by the overhead wire system at the average rate of 20 tons an hour. The vessels named returned to port Monday night and anchored off Tompkinsville, S. I., after having been away for a week, three days of which were spent at sea giving the Milier conveyor at horough trial under varied conditions. At the conclusion of Monday's trial, the third of the series—when I'd bags of coal, each ported in 66 minutes without seedent, so of them being delivered in 44 minutes—the trial board anounced that the test was ended and that they were atsisted with the result. The trial board ansumed that the test was ended and that they were atsisted with the result. The trial board ansumed to the same of the same of the Marcellus was composed of Commander A. B. M. Lillis, in command of the Marcellus was composed of Commander A. B. M. Lillis, in command of the Marcellus was composed of Commander A. B. M. Lillis, in command of the Marcellus Lieut. Commander W. D. Roce and Lieut. John B. Bernardo. I was a sent of the contract of th

the foremast and mainmast heads of the coilier, the wire then leading to the water where a cone-shaped canvas bag towing astern. Keeps the line and the coilier of the coilier and its load.

A specially contrived Lidgerwood engine, having two winding drums, is located close to and abaft the foremast on the coilier. A steel 3-4 inch eable leads from one down to the foremast head, over a sheave, across the block on the war ship's abears, thence back to the coilier's mast, and down to the rear drum. This enging gives a reciprocating motion to the conveying rope, paying out one part under tension.

The bags of coal are first hoisted upon an iron eage or elevator.

The letter U inverted represents the from tale with hooks at its end, to which the bags are suspended, on two short rods that project from the top of the elevator. The carrier is fitted with a long pointed hook pivoted at its bottom. This hook, driven under the iron bale, engages it, the elevator drops and the carrier starts at a speed of 1,300 feet a minute for the war ship. When it reaches that end of the route, latch, which ferienaes the hook and the bars, with their iron bale drop down the canvas chute to the decks of the war ship, where the jackies coamper away with it on trucks to the bunkers.

Three hundred feet is the distance maintained between ships during the operation. The test was a success from the start.
